

## SONEXIS CONNECTS: **Healthcare**

Providing reliable, cost-effective and secure conferencing solutions

Your healthcare system encompasses an immense network of resources. Coordinating communication between your various hospitals, care facilities, medical professionals and auxiliary support services can present some of the most daunting technical challenges of any industry.

In addition to managing logistics, there are ever-present requirements to reduce costs, increase productivity, protect patient confidentiality and improve the one obstacle that can stand in the way of performance and patient care - communication. Sonexis can help.

sonexis has the solutions

## Discover the Benefits

### Higher Productivity

With Sonexis solutions, healthcare providers can streamline operations and improve workflow efficiencies. Users can integrate applications like the Sonexis Operator Console™ to effortlessly coordinate teams for patient transfers, triage assessments and more.

### Accessibility

ConferenceManager™2 features dynamic scheduling, notification and integration capabilities. Emergency Conferencing and BlastDial™ enable you to instantly contact an entire team in times of emergency.

### Cost Savings

In healthcare, budgets are daunting. It's time to bring your collaboration costs under control. Once you purchase the Sonexis ConferenceManager2, you own the ports perpetually and will never see an end-of-life notice.

### Security

When patient confidentiality is paramount, you need a solution you can trust. The ConferenceManager2 strictly controls conference access with client authentication and encrypted communications. Sonexis systems can also be installed behind your firewall for added security.

### Investment Protection

Leverage your existing infrastructure investments with the network-agnostic Sonexis ConferenceManager2. Sonexis is also committed to providing lifetime product support and will not discontinue products you choose today.

### Disaster Recovery

Communication disasters are prevented with the Sonexis ConferenceContinuity™ high availability overlay. ConferenceContinuity™ provides the most comprehensive protection locally or geo-located behind a corporate firewall.

## Healthcare Advantages

Sonexis has been setting the standard for Audio, Web and Video conferencing excellence for nearly two decades.

Sonexis ConferenceManager2 provides healthcare organizations with the most secure, flexible and cost-effective solutions for conferencing and collaboration. With the ConferenceManager2 and its powerful suite of collaboration applications, you can finally get the most out of your conferencing communication.

- Operator Console™ Streamlines Workflows with Seamless Call Routing and Consolidated Resource Management
- Effortlessly Coordinate Transportation Resources to Facilitate Patient Transfer
- Better Manage Referral Calls and Triage Consultations
- Initiate Emergency BlastDial Communication for Incident Management and First Responders

## ConferenceManager™ 2

### SMART

The financial picture is clear: Sonexis ConferenceManager2 provides a rapid, compelling return on investment. ConferenceManager2 usually pays for itself in less than 12 months. Budget busting service providers just can't compete.

### SIMPLE

Whether you're an end-user or the system administrator, you'll be amazed how easy conferencing can be. Just plug ConferenceManager2 into your network and within minutes your organization will be scheduling, launching and recording conferences; collaborating in real-time; even inviting new attendees on the fly.

### SECURE

ConferenceManager2 integrates into your security infrastructure. With a wide range of security features and disaster recovery options, ConferenceManager2 can be tailored to your needs. It's no surprise why so many organizations trust Sonexis.

### Sonexis spurs collaboration across industries

Designed to integrate seamlessly into any voice and data network, ConferenceManager2 has been deployed by hundreds of leading organizations with minimal cost, effort or administration.

- Quick and easy installation
- Resides on your network; secure and reliable
- Supports both PSTN and VoIP
- Supports reservationless and scheduled conferencing
- Audio, Video and Web recording capabilities
- Utilizes common interfaces such as Microsoft Outlook, Lync and Lotus Notes
