

DATA SHEET Sonexis Emergency Conferencing

In the event of an emergency, it is critical to connect emergency responders as quickly as possible with minimal effort. The ConferenceManager™2 offers the ideal solution: Emergency Conferencing.

Emergency Conferencing uses the ConferenceManager2's dynamic Blast Dial functionality to instantly connect first responders in an audio conference. With Emergency Conferencing, you can save time, save effort, and potentially save lives.

DISCOVER THE BENEFITS:

How Does Emergency Conferencing Work?

When an emergency occurs, a first responder dials a dedicated emergency number, accessing the ConferenceManager2. This instantaneously creates a conference and triggers a blast dial-out to the other members of the response team. Each team member is then joined directly to the emergency conference in progress, or, if configured, team members are prompted to join before being added.

Emergency Conferencing Capabilities

- Automatic Blast Dial to a list of emergency personnel
- Supports an unlimited number of emergency groups
- Up to 3 dial-out phone numbers per person
- Phone number mapping to an emergency group, requiring no user input to initiate an emergency conference
- Blast Dial initiated when first person dials in (based on dialed number), no additional user input required

Support for Emergency Conferencing

Activated via license key, Emergency Conferencing is available as an added feature to the rich conferencing functionality of the ConferenceManager2.

The ConferenceManager2 is an in-house audio conferencing platform that eliminates the costly pay-as-you-go fees of subscription-based services, while setting new standards for ease-of-use, administration, flexibility, and control. ConferenceManager2 works with any existing voice or data network and is available with fully integrated web conferencing.

Web Controls

- Activate Blast Dial to an Invitee List or Address Book
- Supports up to ten sub conferences from the main audio conference
- Mute, Unmute, Disconnect, Hold, Add Additional Callers
- ActiveTalker™ Indication
- Viewable listing (by name or phone number) and count of all conference participants
