

Sonexis ConferenceConnect™

We understand that no two clients, and no two conferences, are exactly alike. Sonexis ConferenceConnect™ has engineered conferencing services to work together in the way that best suits your needs.

Our experienced, highly trained conferencing specialists will listen to what you want to accomplish, then help you choose the tools that will deliver exactly what you need. In other words, we tailor conferencing services to meet your needs, not the other way around.

QUALITY SERVICES:

DiamondPass™

Operator Assisted Audio Conferencing

Highly qualified conferencing specialists handle every detail, connecting each site to make sure your conference proceeds as planned. Skilled specialists consistently impress even long-time clients with their polished approach to each conference. Ideal for: Financial Results, Interactive Presentations, PR Meetings, Distance Education and any other meeting where quality counts.

EventSync™ Streaming Media

Webcasting involves streaming audio, video or other media to any user with a computer and internet connection. As one of the fastest growing methods of communication, webcasting enables you to reach an immense audience around the world.

Often used in combination with Sonexis audio or video conferencing, webcasting enables clients to present their message with maximum interest and impact. Providing the most immersive, detailed conferencing experience, Sonexis EventSync™ brings the power of professional-quality webcasting to large and small clients throughout the world. It's the perfect solution for private corporations, government, education, and the financial, telemedicine and legal industries.

White Glove Concierge Video Conferencing Services

Sonexis operator assisted video conferences are powered by the powerful EVERGREEN™ MCU (Multipoint Control Unit), an established worldwide leader in collaboration technology. Professional, courteous conferencing specialists handle every detail, connecting each video site to make sure your conference proceeds as planned. Sonexis video specialists have experience in managing events all over the world. Moreover, our video platform allows high definition video quality, multiple screen layouts, and full interactivity.
